

Dear Participant,

Good day!

Thank you for your continued support and collaboration throughout the development of *Tutorly: An Intelligent Tutor Matching And Academic Progress Monitoring Systems For Learners In Nasugbu, Batangas*. From the initial business requirements gathering, provision of datasets, and consistent feedback during system development, your contributions have been instrumental in shaping the system to suit the operational needs of BATELEC I. At this stage, I am now moving toward the final phase of the study - the formal system evaluation.

As one of the identified stakeholders, you are invited to participate in the evaluation by engaging with the E-ForeSy system through a guided demonstration. Following the interaction with the system, you will be asked to accomplish the **Usability Testing Questionnaire**, which evaluates the system's effectiveness, efficiency, and satisfaction based on ISO 9241-11 standards; and

Please be assured that your participation is voluntary, and you may withdraw at any time without consequence. All information gathered will be treated with strict confidentiality and will be used solely for academic and research purposes. No personally identifiable information will appear in any publication or report resulting from this study.

By proceeding with the evaluation and completing the questionnaires, you are giving your **informed consent** to participate in the study and to allow your responses to be used in support of the research.

Thank you once again for your valuable time and continued support in completing this research initiative.

Respectfully,

Aj E. Catli | ajcatli26@gmail.com | 09460584674

Sofia La-Arni B. Tapongco | tapongco.sofia.b@gmail.com | 09686016060

## TUTORLY USABILITY TESTING QUESTIONNAIRE

### *Task-Based Evaluation and Perceived Usability Assessment*

#### *Part I. Participant Information*

Name (Optional): \_\_\_\_\_ Date: \_\_\_\_\_

Office / Department (Please put a check on the box provided):

- ☐ Student  
☐ Tutor  
☐ Parent/Guardian  
☐ Administrator

Age: \_\_\_\_\_

Have you used an online tutoring platform before? ☐ Yes ☐ No

#### *Part II. Task-based Usability Evaluation*

*The focus of this usability testing was solely on the user interface and experience design of Tutorly. The participants' technical skills or forecasting expertise were not under evaluation.*

#### **USER AUTHENTICATION MODULE**

| <b>Task</b>                          | <b>Complete Success</b> | <b>Success with one minor issue</b> | <b>Success with a major issue</b> | <b>Failure</b> | <b>Time taken (minutes)</b> |
|--------------------------------------|-------------------------|-------------------------------------|-----------------------------------|----------------|-----------------------------|
| Log in using valid credentials       |                         |                                     |                                   |                |                             |
| Use "Show Password" Option           |                         |                                     |                                   |                |                             |
| Access "Forgot Password" Feature     |                         |                                     |                                   |                |                             |
| Successfully Log Out and Log Back In |                         |                                     |                                   |                |                             |

Overall, this task was?

1. Very Difficult      2.      3.      4.      5.      6.      7. Very Easy

☐      ☐      ☐      ☐      ☐      ☐      ☐

### TUTOR MATCHING & RECOMMENDATION MODULE

| Task                                          | Complete Success | Success with one minor issue | Success with a major issue | Failure | Time taken (minutes) |
|-----------------------------------------------|------------------|------------------------------|----------------------------|---------|----------------------|
| Access tutor recommendation feature           |                  |                              |                            |         |                      |
| View recommended tutors                       |                  |                              |                            |         |                      |
| Filter tutors (subject, availability, budget) |                  |                              |                            |         |                      |

| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

### Part III. Perceived Usability with the System Usability Scale (SUS)

Please indicate your level of agreement with the following statements based on your experience using the Tutorly. Your honest feedback will help us improve the interface and user experience.

5 – Strongly Agree  
4 – Agree  
3 – Undecided

2 – Disagree  
1 – Strongly Disagree

| <i>System Usability Scale (SUS)</i>                        | <b>5</b> | <b>4</b> | <b>3</b> | <b>2</b> | <b>1</b> |
|------------------------------------------------------------|----------|----------|----------|----------|----------|
| 1. I would like to use this system frequently.             |          |          |          |          |          |
| 2. The system is unnecessarily complex.                    |          |          |          |          |          |
| 3. The system was easy to use.                             |          |          |          |          |          |
| 4. I need technical support to use the system.             |          |          |          |          |          |
| 5. The features are well integrated.                       |          |          |          |          |          |
| 6. The system is inconsistent                              |          |          |          |          |          |
| 7. Most users would learn to use this system very quickly. |          |          |          |          |          |
| 8. The system is cumbersome to use.                        |          |          |          |          |          |
| 9. I felt confident in using the system.                   |          |          |          |          |          |
| 10. I needed to learn many things before using the system. |          |          |          |          |          |

### Part IV. Heuristic Evaluation

Please evaluate the interface according to the five usability domains listed below. For each statement, provide a rating from 0 to 4 where:

0 – No Issue  
1 – Cosmetic issue only  
2 – Minor usability problem  
3 – Major usability problem  
4 – Usability catastrophe

| <i>Visibility of System Status</i>                                                               | <b>0</b> | <b>1</b> | <b>2</b> | <b>3</b> | <b>4</b> |
|--------------------------------------------------------------------------------------------------|----------|----------|----------|----------|----------|
| 1. The system provides clear feedback on user actions and status.                                |          |          |          |          |          |
| 2. Notifications are timely                                                                      |          |          |          |          |          |
| 3. The system displays system status (e.g., loading, processing, etc.) clearly and in real-time. |          |          |          |          |          |

|                                                                                                                   |  |  |  |  |  |
|-------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|
| <i>Real-World Terminology</i>                                                                                     |  |  |  |  |  |
| 1. The language used in the system is consistent with the user's expectations and domain-specific terminology.    |  |  |  |  |  |
| 2. Labels and buttons are clear                                                                                   |  |  |  |  |  |
| 3. Minimal technical jargon                                                                                       |  |  |  |  |  |
| <i>Aesthetic &amp; Minimalist Design</i>                                                                          |  |  |  |  |  |
| 1. The interface is clean, with no unnecessary elements that distract the user.                                   |  |  |  |  |  |
| 2. The visual design is simple, providing a clear focus on key tasks.                                             |  |  |  |  |  |
| 3. The layout is consistent.                                                                                      |  |  |  |  |  |
| <i>Feedback &amp; Responsiveness</i>                                                                              |  |  |  |  |  |
| 1. The system responds quickly to user actions, providing feedback in a timely manner.                            |  |  |  |  |  |
| 2. All user inputs are acknowledged with appropriate feedback (e.g., loading indicators, success/error messages). |  |  |  |  |  |
| 3. Performance is consistent                                                                                      |  |  |  |  |  |
| <i>Consistency &amp; Standards</i>                                                                                |  |  |  |  |  |
| 1. The system uses familiar icons, terminology, and interaction patterns consistent with industry standards.      |  |  |  |  |  |
| 2. Interface elements, such as buttons and menus, behave consistently across all modules.                         |  |  |  |  |  |
| 3. Users can predict the behavior of interface elements based on previous interactions.                           |  |  |  |  |  |

#### *Part IV. Recommendations/Future Enhancement in the Developed System*

Please share any comments or suggestions you may have to improve the system.

1. What feature did you find most useful in Tutorly?

---

---

---

---

2. What part of the system was confusing or difficult to use?

---

---

---

---

3. Do you have any recommendations to improve the interface or workflow?

---

---
